REMINDER

Remember to CHOOSE THE BEST PROTECTION, MAKE SURE IT FITS, KEEP IT CLEAN AND WEAR IT!

Think Safe, Work Safe and Be Safe!!

Do you know that Eye Protection has been used in the construction industry since 1910? That is right, Eye Protection has been used in the construction industry since 1910 and, undoubtedly, many workers have escaped serious eye injury because of it. You may personally know some fortunate individuals who saved their sight this way.

TAKE TIME TO SELECT THE RIGHT KIND

Depending on the job, you may need goggles, an eye shield, a face mask or safety glasses. All it takes on your part is a little effort to select the appropriate type and to wear it.

FOUR BASIC TYPES OF HAZARDS

Basically, there are four types of particles that cause eye injuries on the job.

- Unidentified Flying Objects:** These microscopic objects consist of dust and particles floating around in the air, generated by wind, equipment, or cleaning operations. When working in dusty conditions, wear eye protection. Even a small speck in the eye can lead to trouble.
- Particles Resulting** from Chipping, Grinding, Sawing, Brushing, Hammering or Using Power Tools: These particles move at an amazing speed and strike with the force of a bullet. Wear eye protection any time overhead operations are performed.
- Invisible Hazards:** You can't see the injurious light rays generated by welding operations or laser beams. And their effects often are not felt until hours later. Wear the eye protection required when using such equipment. And if you happen to be working nearby, don't look in the direction of welding arcs or where a laser beam is being used.
- Liquids:** Hot liquids, such as tar or asphalt, solvents, paint, and solutions for cleaning masonry or metal, can cause serious eye injury if splashed in your face. The use of proper eye protection, and a full face shield is essential when transferring liquids between containers and when using caustic or acid cleaners.

INSTANT DARKNESS

Eye injuries happen in a split second. So put on your eye protection as soon as you get back to your job after this meeting. *Don't blind yourself to the necessity of protecting your sight.*

BE A ZERO HERO!

Every reasonable precaution should be taken to protect yourself and promote our ZERO ACCIDENTS culture.

Be Safe!

PLEASE PLAN TO HAVE A SAFE DAY!

Quote of the Day

"Working without safety is a dead-end job."

~Author Unknown.
