

Safety Flash

February 06, 2015.

Ears Safety.

Safety Statistics
First Aid Free Days: 66

REMINDER

Remember to CHOOSE THE BEST PROTECTION, MAKE SURE IT FITS, KEEP IT CLEAN AND WEAR IT!

Think Safe, Work Safe and Be Safe!!

Most worksites are noisy places, and this is why hearing protection is part of our daily uniform. Did you said hearing protection is part of our daily uniform? That is absolutely right, hearing protection is part of our daily uniform. How do we know when to use hearing protection? You know you are working in a noise hazard environment if you have to raise your voice to talk to someone. You could face temporary or even permanent hearing loss as a result of noise exposure.

Hearing Protection

Hearing protection must be used in areas where noise levels meet or exceed 82 dBA (80 dBA in Saskatchewan). Double hearing protection is required where noise levels meet or exceed 100 dBA. Hearing protection must meet or exceed specifications in CSA Z94.2+. Refer to the Pipeworx Hearing Conservation Program Chart for different level of noises generated by different equipment for specific requirements related to the selection, use and maintenance of hearing protection equipment. Pipeworx supply hearing protection for free and if you don't know where to get them please ask your supervisor.

Depending on what kind of noise hazards you work with, you will choose between a variety of different types of ear protection:

- Disposable foam plugs
- Re-useable plugs
- Earmuffs etc.

Please continue to take good care of your EARS☺

BE A ZERO HERO!

Every reasonable precaution should be taken to protect yourself and promote our ZERO ACCIDENTS culture.

Be Safe!

PLEASE PLAN TO HAVE A SAFE DAY!

Quote of the Day

"Working without safety is a dead-end job."
